

Please be a responsible pet owner as well as an advocate for pets. If you see a pet in a vehicle and is excessively panting and seems to be uncomfortable, please call the local authorities. Unfortunately, we see too many die a painful death this way during the summer.

Let's all do our part to protect the animals. We are their VOICE!

WHEN IS IT TOO HOT FOR YOUR DOG

According to PETA
(People for the Ethical Treatment of Animals)

on a **78°** DAY on a **90°** DAY

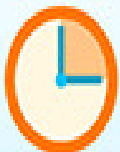

the temperature inside a vehicle can get up to:

120°
in minutes

160°
within 10 minutes

DOGS CAN DIE OF HEAT STROKE

within
15
minutes
